ABSTRACT

Louisiana's initiative to assist local communities to develop and operate school-based health centers (SBHCs), in place for 10 years, is a nationally-recognized model. This annual report illustrates the vital work being done in Louisiana's SBHCs over the past 10 years to assist families in ensuring their children's health and well-being. Section 1 of the report details the continuous expansion of school-based health care that has occurred since the passage of the Adolescent School Health Initiative Act in 1991. This section also highlights programs and partnerships contributing to Louisiana's success, including the Continuous Quality Improvement program. Section 2 summarizes the leading reasons children visit SBHCs, demonstrates the wide variety of services available, and highlights the critical role that health centers fill in the lives of the students and schools they serve. Section 3 features profiles of each of the operating school health centers, illustrating the strong links between the SBHCs and the communities they serve. Three appendices include sample diagnoses for each of the categories of conditions by which SBHC data are coded, the text of the state law that created the program, and the 2000-2001 financial statement. January, 2002

Dear Citizens of Louisiana:

It is with great pleasure that I present the 2000-2001 Louisiana School-Based Health Centers' Annual Services Report. This year marks the 10th anniversary of the passage of the Adolescent School Health Initiative (ASHI) Act in Louisiana. The 1991 ASHI Act authorized the Office of Public Health to establish school-based health centers (SBHCs) in public schools throughout the state. The passage of the ASHI Act stemmed from growing concern about the health of Louisiana's youth and the desire to provide easy access to needed physical and mental health services to this hard to reach group.

Over the past 10 years, the SBHC movement has gained immense popularity and seen rapid growth. In 1991, there were only four SBHCs. Today we are proud of the 47 state-funded school-based health centers throughout the state, which provide access to care to nearly 46,000 of Louisiana's children. The commitment of policymakers to the health of Louisiana's children is apparent ten years later in the continued expansion and funding of the SBHC program. Six new sites are scheduled to open in 2001-2002.

The public can be assured that our children are receiving high quality care at the SBHCs in accordance with best medical practices. All state-funded SBHCs are required to comply with the *Principles, Standards and Guidelines for School-Based Health Centers in Louisiana*. All centers must undergo an arduous continuous quality improvement on-site review by a team of specialists in adolescent care.

Louisiana is recognized as a national leader in school-based health care and we should take pride in our many accomplishments. I extend a heartfelt thanks to all the administrators, health professionals, principals, school staff, community leaders, parents and students whose hard work and dedication over the past ten years have made this program such a success.

Sincerely,

David W. Hood
Secretary

Proclamation

WHEREAS, physical and mental health care is immeasurably important to the overall well-being of the youth in Louisiana; and

WHEREAS, optimal physical and mental health of our students leads to optimal academic achievement; and

WHEREAS, all youth in Louisiana deserve access to comprehensive health care; and

WHEREAS, school based and school linked health centers provide a vital, necessary, and important link in a health care network within many communities across the state of Louisiana; and

WHEREAS, school based and school linked health centers provide accessible, affordable, quality health care and health education that improves the lives of young people and their families; and

WHEREAS, school based and school linked health centers are supported in many communities by parents, teachers, school administrators, and other concerned citizens.

NOW, THEREFORE, I, M.J. "Mike" Foster, Jr., Governor of the state of Louisiana, do hereby proclaim January 22-26, 2001, as

LOUISIANA ASSEMBLY ON SCHOOL BASED HEALTH CARE WEEK

in the state of Louisiana, and urge all our citizens to recognize the role of local school based and school linked health centers in improving the health and well-being of all youth in the state.

In Witness Whereof, I have hereunto set my hand officially and caused to be affixed the Great Seal of the State of Louisiana, at the Capitol, in the City of Baton Rouge, on this the 10th *day of* January *A.D.* 2001

Governor of Louisiana

Executive Summary

This year marks the 10th anniversary of the passage of the Adolescent School Health Initiative. In the late 1980s, policy makers became increasingly concerned about the health status of Louisiana's adolescents. This was the only age group for which morbidity and mortality rates were increasing. As a result, during the 1990 Regular Session of the Louisiana Legislature, a study request was passed to look into the feasibility of establishing School-Based Health Centers (SBHCs) in Louisiana. Subsequently, in 1991, the Adolescent School Health Initiative was enacted under Governor Buddy Roemer. SBHCs in Louisiana follow a comprehensive model in order to address the main threats to adolescents' health and their academic success which are not diseases, but the risky behaviors they engage in and the choices they make.

Louisiana has seen the impressive growth of SBHCs from 4 sites in 1991 to 47 SBHCs in 2000-2001 and 6 additional sites to open in 2001-2002. SBHCs provide access to medical and mental health care that many Louisiana students would not otherwise be able to obtain. Many policy makers and community leaders echo United States Senator John Breaux's sentiment when he said, "My fight for continued funding and expansion of School-Based Health Centers rests on the overwhelming success of these centers in providing accessible and affordable health care for Louisiana students."

Several of these policy makers from the departments of education, social services, and health and hospitals sit on the Intergovernmental Coordinating Council (ICC) which is committed to integrating common school-based health care objectives; progressively coordinating school-based medical, mental and addictive disorder services with community-based primary care services; and expanding existing school-based services into a seamless statewide network of comprehensive child health care. The members of the ICC assist in implementation, oversightand funding assistance for school-based health centers.

The 2000-2001 Annual Services Report illustrates the vital work being done by SBHCs in Louisiana to assist families in assuring their children's health and well being.

Section One - Program Highlights & Overview details the continuous expansion of school-based health care that has occurred since the passage of the ASHI Act in 1991. On pages 8-10, the reader is provided a glimpse of some of the successes of Louisiana SBHCs. This section also highlights programs and partnerships that have made SBHCs a success including the Continuous Quality Improvement program. It is through these efforts and partnerships that recognition and strong support have been built for school-based health care in Louisiana.

Section Two - Who Visits SBHCs and Why summarizes the leading reasons children visit SBHCs. It demonstrates the wide variety of services available at the health centers including primary and preventive health care, psychosocial services and health education. The data reveals the critical role that health centers fill in the lives of the students and the schools they serve.

Section Three - Louisiana SBHC Profiles features each of Louisiana's SBHCs. The community's involvement and commitment are integral to the operation and mission of SBHCs. Review of the community advisory boards and partner organizations evinces the strong link between the communities and the health centers.

Appendices A-C include (A) sample diagnoses for each of the categories of conditions by which SBHC data are coded, (B) the text of the state law that created the program, and (C) the 2000 –2001 financial statement.

Louisiana SBHC Highlights: 1991-2001

1991 Governor Buddy Roemer signs the Louisiana Adolescent School Health Initiative (ASHI) Act into law (R.S.40:31.3) authorizing the Office of Public Health (OPH) to facilitate the development of School-Based Health Centers (SBHCs) in public schools.

The Bush Administration recommends SBHCs in elementary schools nationwide.

1992 The Louisiana SBHC Intergovernmental Coordinating Council is established to assist in implementation, oversight, and funding assistance for health centers in schools.

1993 Maternal & Child Health Block Grant (Title V) funding establishes an affiliation with Louisiana SBHCs.

1994 The Louisiana Assembly on School-Based Health Care (LASBHC) is formed. Its mission is to serve as the State Chapter of the National Assembly on School-Based Health Care; provide advocacy, support and coordinate activities set by the state membership; and seek support for expansion of SBHCs.

"Healthy Schools, Healthy Communities," the first federal SBHC program, is born.

"I am convinced that a lot of our children who come from such difficult family circumstances are going to have to continue to get health care information and some basic health care services in the schools. That's why I've always been a strong supporter of the school-based health clinics." -Former President Bill Clinton

1995 The Louisiana Legislature allocates $1.6 million in one-time state funds for SBHC expansion.
The ASHI Program of OPH is the recipient of a Robert Wood Johnson (RWJ) Making the Grade Planning Grant for SBHCs.

1996 The ASHI Program of OPH launches a collaborative agreement with the State Department of Education to fund Southeastern Louisiana University's Excellence in Health and Education Project. The goal of the Project is to provide leadership and advocacy to guarantee quality health and educational learning opportunities.

"In my professional lifetime the health of every group of American society has improved except for teenagers. Isn't school the best place for a primary health care facility?" -C. Everett Koop, former U.S. Surgeon General

1997 The Louisiana State Legislature appropriates recurring line item budget for SBHCs.
The ASHI Program of OPH is awarded a RWJ Making the Grade Implementation Grant.

The Governor's Task Force on SBHCs concludes that Louisiana SBHCs are meeting the comprehensive health needs of underserved children and youth and are in compliance with the law.

"The presence of a health center within a school is of overwhelming value to students." -Robert Wood Johnson Foundation Study

1998 The ASHI Program of OPH implements a Continuous Quality Improvement Program for Louisiana SBHCs.

1999 The Governor's Children's Cabinet recommends increasing the number of SBHCs by 50% by the year 2000.

Sue Catchings, Director of Health Care Centers in Schools of Baton Rouge, becomes President-Elect of the National Assembly on School-Based Health Care.

Central High SBHC in St. Helena Parish becomes the first federally funded SBHC in Louisiana.

"I previously was against the idea of a school health center, but after seeing first hand what they are all about, I made a 180 degree turnaround, and now am a strong advocate for school-based health centers." - Cecil J. Picard, Superintendent of Education, Louisiana.

2000 Tobacco Settlement dollars are used to fund SBHCs in Louisiana.

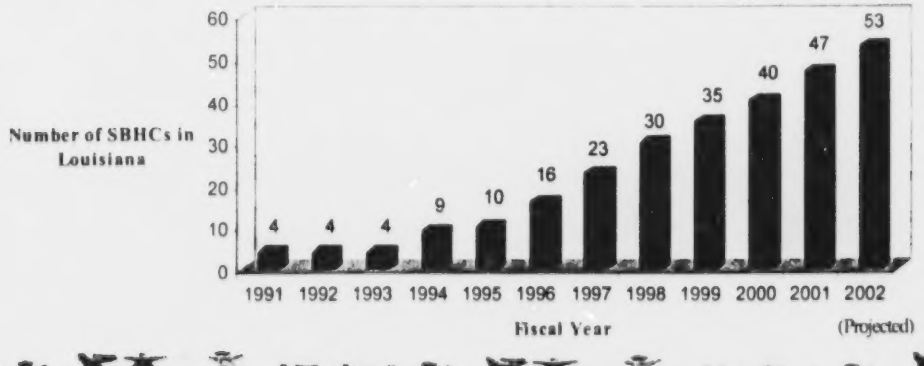
The Louisiana Medical Society Journal devotes its entire December issue to School-Based Health Care in Louisiana.

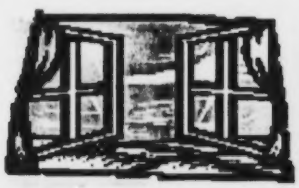
The Council for a Better Louisiana publishes *The People's Agenda: Report Care 2000* endorsing SBHCs and recommending that at least one SBHC be in each parish by 2010.

2001 The LASBHC is represented on the Children's Cabinet Advisory Board.

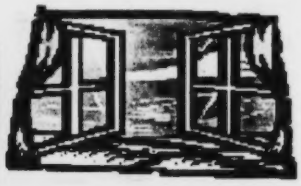
Governor M. J. "Mike" Foster, Jr. proclaims January 22-26, 2001 as LA Assembly on School-Based Health Care Week.

"My fight for continued funding and expansion of school-based health centers rests on the overwhelming success of these centers in providing accessible and affordable health care for Louisiana students." -U.S. Senator John Breaux, Louisiana.





A Look at Louisiana's Children & Youth



About 31% of Louisiana's population are youth, below the age of 19. *-U.S. Census, 2000*

Kids & School

- 737,223 children and youth (pre-k through twelfth grade) attend public school.
- 1,483 public schools are established in LA.
- 11% of teens (ages 16-19) drop out of high school.
- 12% of teens are not attending school and not working.

-LA Department of Education, 2000-2001 and Kids Count Data Book, 2001

Poverty Status

- 26% of LA's children live in poverty.
- 21.9% of LA's youth (ages 0 -19) are still uninsured.
- 58.6% of preK - 12th grade students in public schools receive free/ reduced lunch.

-Kids Count Data Book, 2001, Children's DefenseFund, 2001 and Department of Education,2000-2001

Only half of the mothers under the age of 15 started prenatal care in the first trimester of pregnancy.
-Louisiana Health Report Card, 2001

School-Based Health Center Scope

- 4.9% of the public schools are served by the SBHCs throughout Louisiana.
- 6.2% of the students attending public schools have access to SBHCs.
- 4.6% of the students attending public schools are enrolled in SBHCs.
- 3.4% of the students attending public schools in Louisiana are receiving services from SBHCs.

-Department of Education and Office of Public Health, 2000-2001

The three leading causes of death for Louisiana kids ages10-19 are motor vehicle accidents, homicides, and suicide, all of which are preventable.
-Office of Public Health, 2001

Comparison with other U.S. States

Health Indicator	National Rank
Health insurance coverage for kids	47
Children living in poverty	49
High school dropouts	36

Comparison with U.S. Trends

Health indicator	LA stat.	U.S. stat
Child Death Rate (ages 1-14)*	32	24
Rate of teen deaths by accident, homicide, and suicide (age 15-19)*	71	54
Teen birth rate (ages 15-17)**	40	30

*Rates per 100,000 youth
**Rates per 1,000 females
-Kids Count Data Book, 2001

Prescriptions For Success

"Schools could do more than perhaps any other single institution in society to help young people, and the adults they will become, to live healthier, longer, more satisfying, and more productive lives."
Carnegie Council Adolescent Development

Health Education

Family/Community | **Physical Education**

Health Promotion for Staff — **Eight Components of a Coordinated School Health Program** — **Health Services**

Healthy School Environment | **Nutrition Services**

Counseling, Psychological &Social Services

Preventive health services provided through schools, coupled with health education and counseling that promote healthy lifestyles and self-sufficiency, can help contain health care costs.

(U.S. Department of Health and Human Services, 1991)

In early 2000, 16.1 percent of the U.S. civilian noninstitutionalized population (44 million people) had no health insurance coverage.

2000 Medical Expediture Panel Survey of the Agency for Healthcare Research and Quality

Christus St. Frances Cabrini School-Based Health Centers

- By the end of the 1997–98 school year, there was an overall 25% reduction of check-outs for the schools served by the Christus St. Frances Cabrini SBHCs.
- The Christus St. Frances Cabrini SBHCs instituted an Anger Management/Conflict Resolution Program to decrease the number of suspensions in the schools they serve. As a result, suspension rates decreased by approximately 15%.

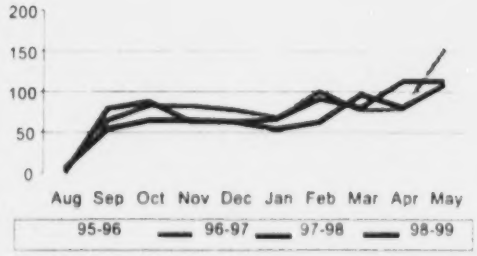
Four Basic Assumptions of Comprehensive School Health
Institute of Medicine, 1997

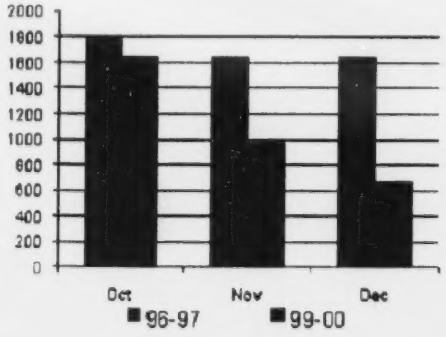
1. The primary goal of schools is education.
2. Education and health are linked. Educational outcomes are related to health status, and health outcomes are related to education.
3. There are certain basic health needs of children and young people. These include: nurturing and support; timely and relevant health information; knowledge and skills necessary to adopt healthful behavior; and access to health care.
4. The school has the potential to be a crucial part of the system to provide these basic health needs. Schools are where children and youth spend a significant amount of their time, and schools can reach entire families. However, the school is only part of the broader community system; the responsibility does not and should not fall only on the schools.

Linwood School-Based Health Center

The 1996-97 school year was the first year of operation for the Linwood SBHC. During that year, there was a 45% (782) reduction in the check-out rate from the previous school year 1995-96 (1413). Year 2 (1997-98) there was a 48% (747) reduction; Year 3 (1998-99) a 54% (644) reduction in check-outs.



Northeast Elementary & Northeast High School-Based Health Centers



Absentee Rates

From the 1996–97 school year to the 1999–2000 school year, there was a steady reduction in absentee rates for Northeast Elementary & Northeast High SBHCs.

Bogalusa High School-Based Health Center

The students in the graduating class of 1999 were freshmen when the center first opened its doors in 1995. They utilized the various services offered through the health center during their entire high school careers. In 1999, 100% of this class (220 seniors) passed the LEAP examination required for graduation.

Delhi Jr. High School-Based Health Center

The 2000–2001 school year was the first year of operation for Delhi SBHC. There was a 30% (439) reduction in the check-out rate from August to December 2000, when compared to the previous year (623).

Adolescents with access to a SBHC nationally were 10 times more likely to make a mental health or substance abuse visit.

(Kaplan, Calonge, Guernsey, Hanraham, 1998)

Medicaid-enrolled elementary students using a school-based health center had statistically significant lower emergency department expenditures compared to a similar population without access to a school-based health center.

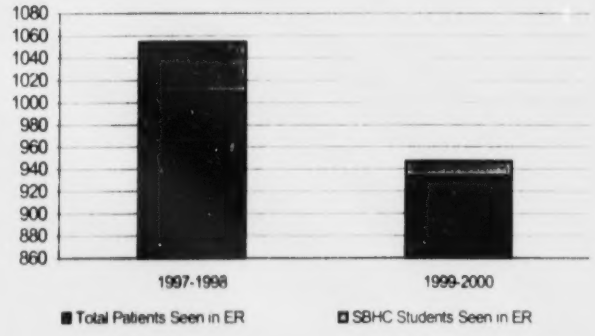
Adams, Johnson, 2000

Rx Bunche Middle School-Based Health Center

2000 – 2001

Bunche piloted the first *Baby Think It Over* Program, a pregnancy prevention and parenting education program, in Jefferson Parish Schools. Ten infant simulators were bought and used for the program that ran three times during the school year. Students were responsible for the "infants" for a week and met with trained staff (teachers, counselors, and nurses) daily to discuss topics such as self-esteem, relationships, abstinence, STDs, domestic violence, and budgeting. In the beginning of the week, the students were excited about getting the "infants," but by Friday, they were ready to turn them in. The results from the pre-tests and post-tests showed that the median age that students wanted to have children rose significantly after the program ended. Many had said 18–20 before the program, but by the end of the program, many were saying 27–30, and some said never.

Bogalusa School-Based Health Centers
Emergency Room Visits



Bogalusa School-Based Health Centers serve a population of approximately 1400 students in two schools. Over 90% of these students are registered with the health centers. The majority of students do not have primary care physicians and historically have used the emergency services of the local hospitals for their primary care. With more and more primary care services being provided through the school health centers, utilization of at least one area hospital emergency department has been reduced, resulting in a decrease in lost revenues for the hospital. This reduction influences the bottom line for overall health care costs.

SBHC Funding History

Fiscal Year	Funding Source	Number of SBHCs
1987-88 1989-90	RWJ grant Louisiana Legislature asks OPH to study SBHC expansion	2 in Baton Rouge 1 in New Orleans
1990-91	Adolescent School Health Initiative Act passes, authorizing OPH to develop SBHCs	
1992-93	Maternal and Child Health (MCH) Block Grant	Affiliation established with 1 SBHC in W. Feliciana & the 3 RWJ SBHCs
1993-94	MCH Block Grant	5 new SBHCs open in rural & inner city urban areas
1994-95	MCH Block Grant; $1.6 million in one-time state funds; Child Care & Development Block Grant for day-care activities; RWJ Making the Grade Planning Grant	1 new SBHC opens; 14 in planning stages; 10 supportive projects
1995-96	MCH Block Grant; $2.5 million in state budget (unfunded); RWJ Making the Grade Planning Grant	5 new SBHCs open; 8 continue planning
1996-97	MCH Block Grant; $1.6 million RWJ Foundation Implementation Grant; $2.65 million State Legislative Appropriation	23 operational SBHCs 8 planning for 1997-98 operation
1997-98	MCH Block Grant; Continuation of RWJ Foundation grant; Continuation of State Legislative Appropriation	30 operational SBHCs 7 planning for 1998-99 operation
1998-99	Continuation of existing funding sources; additional $600,000 in State Legislative Appropriation	35 operational SBHCs
1999-00	Last year of RWJ Foundation Grant; Continuation of MCH Block Grant & State Legislative Appropriation; Additional $1,018,176 in State Legislative Appropriation	40 operational SBHCs
2000-01	Continuation of MCH Block Grant & State Legislative Appropriation; Additional $1,618,588 in State Legislative Appropriation	47 operational SBHCs 6 planning SBHCs
2001-02	Continuation of MCH Block Grant & State Legislative Appropriation; Additional $820,000 in State Legislative Appropriation	53 operational sites projected

11

Louisiana Standards for School-Based Health Centers

Primary Goal

- To provide convenient access to primary and preventive health services for students who might otherwise have limited or no access to health care
- To meet the physical and emotional health needs of adolescents at their school sites

Community Participation

All health centers must originate as a community initiative. State funding is dependent upon evidence of broad community participation.

Sponsoring Agency

The sponsoring agency must be either a public or a private non-profit institution locally suited and fiscally viable to administer and operate a health center serving the needs of adolescents (i.e., health center, hospital, medical school, health department, youth serving agency, school or school system).

School and School District

The host school should agree to work cooperatively with its health center, particularly in developing and implementing a full-scale coordinated school health program. School board approval is a prerequisite for a grant of state funds for planning or operation.

Services

A SBHC must offer comprehensive primary and preventive health services that address the physical, emotional, and educational needs of its student population. Services provided should include medical screenings; treatment for common illnesses and minor injuries; referral and follow-up for serious illnesses and emergencies; on-site care, consultation, referral and follow-up for pregnancy, chronic diseases and disorders, and emotional and mental problems; comprehensive physicals; immunizations; laboratory testing; and preventive services to reduce high risk behaviors.

Parental Consent

A parent or guardian must sign a consent form, approved by school authorities, for a student to receive health center services. Parents may indicate which services they do not wish their children to receive at the centers.

Operating Policies

The hours of operation should ensure that students have easy access to the center's services. In general, a SBHC should have both before-and after-school hours and should operate for some period of time during the summer.

Every school-based health center is required to promote abstinence. Centers are prohibited by State law from distributing contraceptives or abortifacient drugs or devices, and from counseling or advocating abortion, or referring any student to an organization for counseling or advocating abortion.

Staffing

Services at the school health centers are provided by a multi-disciplinary team including a physician and/or nurse practitioner with a collaborating physician, a registered nurse, and a licensed mental/behavioral health professional. In addition, the SBHC is staffed with a medical office assistant and an administrator.

Selection Criteria

The ASHI seeks to provide services to young people with limited or no access to health care providers. Grants are made through a competitive call for proposals process with decisions based upon the socioeconomic and health needs of the student population to be served, the health services available in the communities, the level of community support, the likelihood of success in developing and operating SBHCs that will fulfill its service objectives, and the working relationship between the schools and health care communities.

Continuum of Care

Centers must execute cooperative agreements with community health care providers to link students to support and specialty services not provided at the school site. Centers must arrange 24-hour coverage ensuring that students have access to services during non-operating hours, including nights, weekends, holidays, and summer vacation.

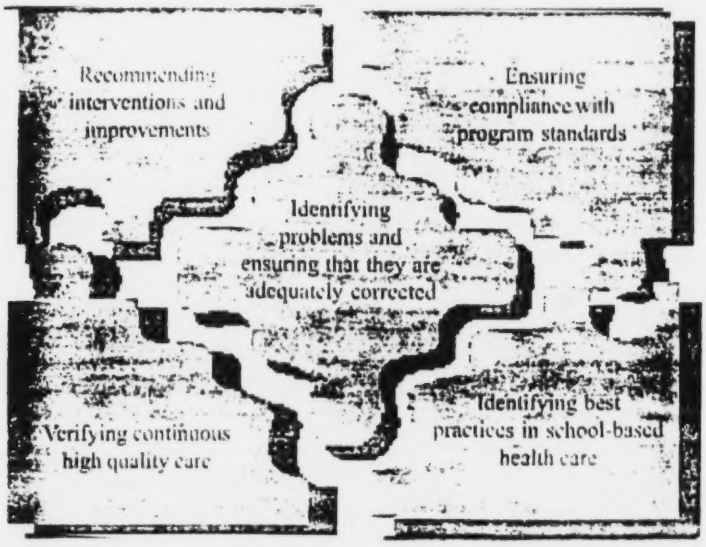
Continuous Quality Improvement Program

The Adolescent School Health Initiative's (ASHI) Continuous Quality Improvement (CQI) Program is designed to assure that quality medical, psychosocial, and educational health services are delivered in accordance with current best practices to children seen at Louisiana School-Based Health Centers (SBHCs).

The CQI Program is built around the principles of:



Recommending interventions and improvements
Ensuring compliance with program standards
Identifying problems and ensuring that they are adequately corrected
Verifying continuous high quality care
Identifying best practices in school-based health care

The CQI Program consists of four steps:

4. **Ongoing Monitoring**

3. **Quality Improvement Recommendations**

2. **On-Site Review**

1. **Self-Evaluation**

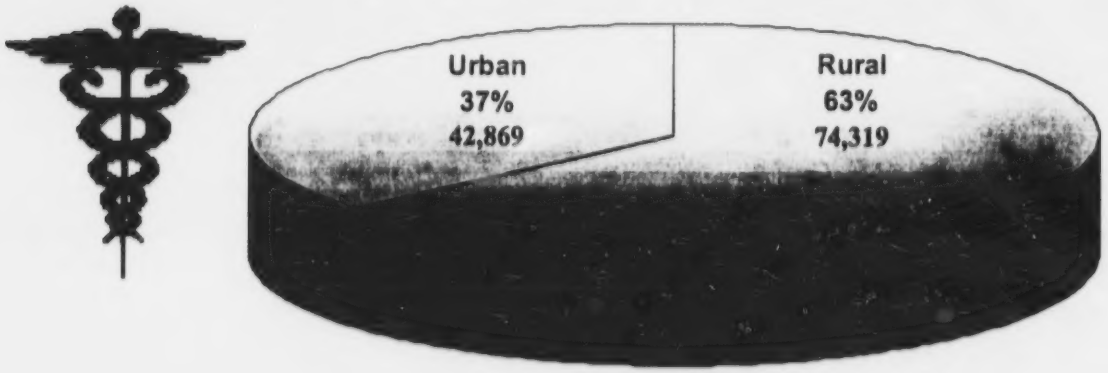
Comparison View of Rural Versus Urban Sites

The Adolescent School Health Initiative began in urban schools with high concentrations of economically disadvantaged and uninsured students. Immediately after its inception, however, rural communities recognized the value of health centers in their schools, which could provide services to adolescents lacking access to health care. While adolescents experience similar physical and mental health challenges, both the obvious and subtle differences can be addressed by the local school-based health center because it remains a community-based initiative. The following information and the SBHC profiles in Section Three illustrate both the similarities and differences among the centers.

Total Visits by Rural & Urban SBHC Sites, 2000-2001



Urban SBHCs include any SBHC located in a city identified by the Metropolitan Statistical Areas (MSA) as being metropolitan. These cities include Alexandria, Baton Rouge, Houma, Lafayette, Lake Charles, Monroe, New Orleans, and Shreveport-Bossier City.
Rural SBHCs include any SBHC that is located in a city that has not been identified as metropolitan by the MSA.

Comparison Ranking of Top 10 Conditions, Urban verus Rural

Urban	Rural
1.General Preventive Medicine	1.General Preventive Medicine
2.Ear, Nose & Throat	2.Mental & Behavioral Health
3.Mental & Behavioral Health	3.Ear, Nose & Throat
4.Head & Central Nervous System	4.Head & Central Nervous System
5.Musculoskeletal & Trauma	5.Musculoskeletal & Trauma
6.Skin & Subcutaneous	6.Gastrointestinal
7.Gastrointestinal	7.Skin & Subcutaneous
8.Pulmonary & Respiratory	8.Pulmonary & Respiratory
9.Gynecology & Breast	9.Eyes
10.Eyes	10.Dental & Oral

The examples of diagnosis within each category of these conditions can be found in Appendix A.

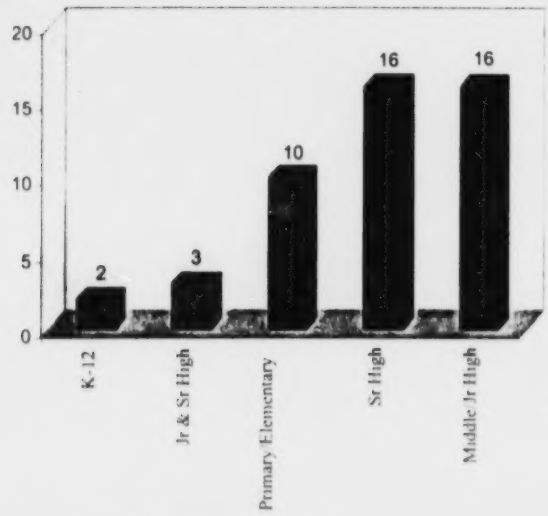
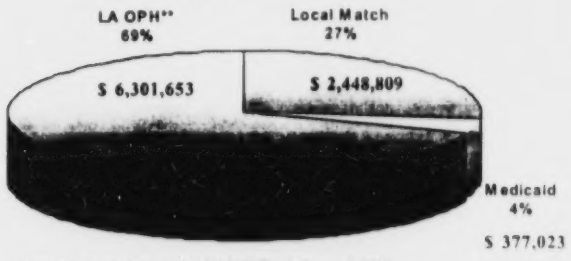
Type of School That Houses the SBHC



Although the program is mandated to serve middle and high school students, children in primary and elementary grades at "feeder" schools are also served (see Visits by Grade on page 18). In some areas, centers were located on primary or elementary school campuses when no spaces were available at nearby middle or high schools (left).

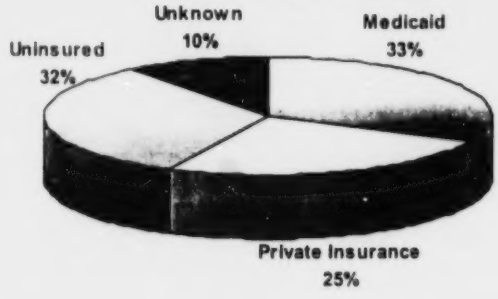
The primary reasons OPH funds centers are demonstrated need for and lack of access to care. Student insurance status, as reported by the centers from parental consent forms, indicates that almost half of patients served are either uninsured, have not declared or do not know their status (below).

Sources of SBHC Funding



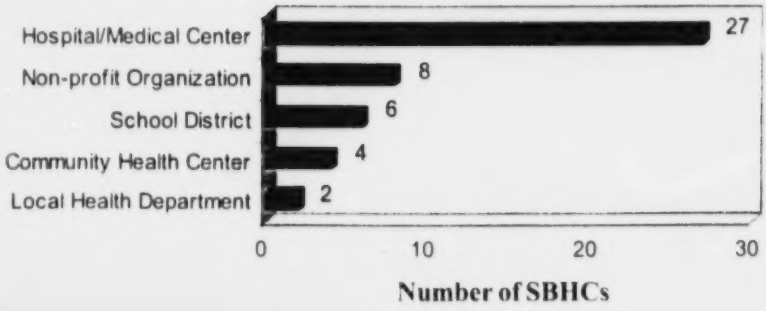
**Includes State General Fund, MCH Block Grant, & RWJ Foundation Grant

Insurance Status of Those Using the SBHC



While the local match requirement is 20% of the OPH grant, communities have exceeded this figure, indicating that for every dollar in state funds, communities provide another 39 cents in local support (above). Medicaid does not reimburse for all services provided at SBHCs (particularly mental health services). This potential funding source, therefore, remains limited, despite expansion of eligibility under LaCHIP (above).

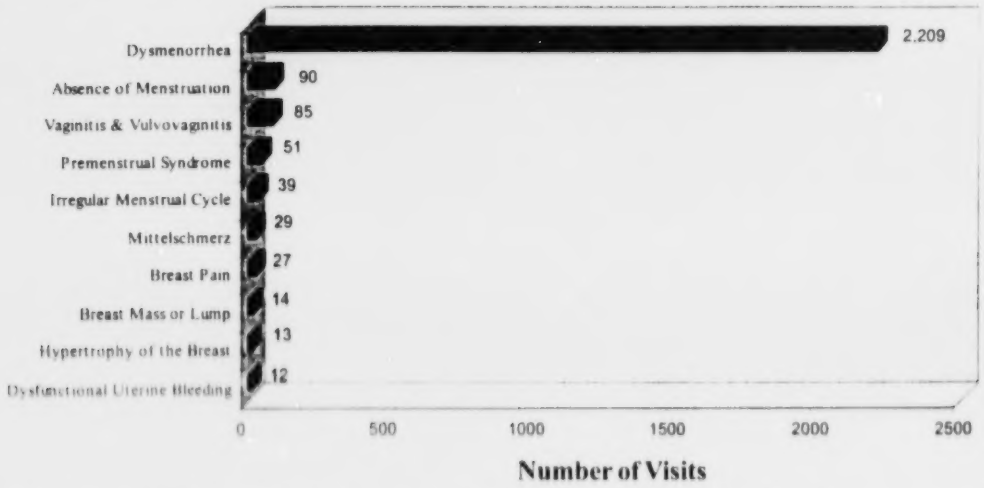
Type of Sponsorship for each SBHC



BEST COPY AVAILABLE

Gynecological and Reproductive Health Visits

Leading Gynecological and Pregnancy Related Visits



Of 117,188 visits in 2000-2001, 3,035 (less than 3%) were for conditions related to gynecological and reproductive health issues. These visits were associated with routine gynecological health, treatment for sexually transmitted diseases and pregnancy care in centers that provide prenatal care. It is the policy of SBHCs in Louisiana, in compliance with the laws of the State on sexuality education, counseling, services and referral, to promote and encourage abstinence from premarital sexual activity. SBHCs serve to reinforce lessons and messages embodied in the school's health education curriculum that abstinence is the most effective way to prevent pregnancy and sexually transmitted diseases. Abstinence is also emphasized for teens seeking treatment for diseases resulting from sexual activity.

Appendices

Appendix A

Examples of Diagnoses within Each Category of Conditions Seen at Louisiana SBHCs

International Classification of Disease, Version 9 (ICD-9) codes are grouped into general categories. Examples of diagnoses within each category follow:

Cardiovascular & Blood: hypertension, hypotension, and blood disorders
Central Nervous System & Head: concussions, headaches, seizure disorder, cerebral palsy, and syncope
Dental & Oral: dental caries and other diseases of teeth and gums
Drug Abuse & Dependence: diagnoses related to alcohol abuse, cannabis abuse, and tobacco use
Ear, Nose & Throat: diagnoses related to conditions of the ear, such as ear infections and wax build-up; the nose, such as nose bleeds and diseases of the nasal cavity and sinuses; and the throat, such as pharyngitis and strep throat
Eyes: diagnoses related to eyes and vision such as vision problems, conjunctivitis, injury to the eye, and near-sightedness
Gastrointestinal: diarrhea, irritable bowel syndrome, constipation, gastroenteritis, and other digestive disorders
General Preventive Medicine: immunizations, comprehensive physical examination with risk assessment, and special screenings
Genitourinary: urinary tract infection
Gynecology & Breast: dysmenorrhea (painful menstruation), irregular menses , and other gynecological disorders
Health Counseling & Education: not limited to, but includes dissemination of information on personal health, consumer health, nutritional health, substance use and abuse, HIV/AIDS, and injury prevention and safety
Mental & Behavioral Health: includes all mental health service provisions such as individual counseling; case management; and diagnoses such as adjustment disorder with depressed mood, conduct disorder, parent-child problem, academic problem, bereavement, and attention deficit disorders. This category includes treatment intervention groups.
Metabolic & Nutrition: obesity and dehydration
Miscellaneous: reported conditions not related to a specific diagnosis category such as abnormal results of blood tests, malaise and fatigue, and administrative procedures
Musculoskeletal & Trauma: joint pain, joint swelling, tendonitis, scoliosis, and any bone, cartilage, or muscle disorders; includes injuries
Pregnancy & Related Issues: suspected pregnancy, pregnancy counseling, prenatal care, postpartum care, and bleeding in pregnancy
Pulmonary & Respiratory: acute lower respiratory infections, asthma, and other respiratory disorders
Sexually Transmitted Diseases: chlamydia, gonorrhea, syphilis, genital warts, and genital herpes
Skin & Subcutaneous: diagnoses related to skin disorders such as acne, warts, psoriasis, scabies, head lice, ringworm, athlete's foot, contact dermatitis, and ingrown nail

Tab B

ADOLESCENT SCHOOL HEALTH INITIATIVE ACT
R.S. 40:31.3

To enact R.S. 40:31.3, relative to adolescent school health; to require the Office of Public Health, Department of Health and Hospitals, to establish an adolescent school health initiative; and to provide for related matters.

Be it enacted by the Legislature of Louisiana:

Section 1. R.S. 40:31.3 is hereby enacted to read as follows:

31.3. Adolescent school health initiative; health centers in schools

A. The Office of Public Health, Department of Health and Hospitals, shall establish an adolescent school health initiative to facilitate and encourage development of comprehensive health centers in public middle and secondary schools in Louisiana which shall provide preventive health services, counseling, acute health services, and appropriate referral for acute health services. Such initiative shall be subject to the approval of the local school systems.

B. The Office of Public Health shall:

(1) Coordinate efforts to facilitate and encourage establishment of health centers in schools by providing information, technical assistance, direction, and, to the extent appropriate, funds to locally based entities for the establishment and operation of health centers in middle and secondary schools.

(2) Convene and participate in an intergovernmental coordinating council which shall be composed of representatives from the department of education, social services, health and hospitals, and other governmental entities or programs

related to health services to assist in implementation, oversight, and funding assistance for health centers in schools.

(3) Apply for and assist local efforts to apply for all available public and private funds to establish and operate health centers in schools.

(4) Establish procedures for allocation of funds appropriated or otherwise available to the program in a manner which prioritizes funding according to the urgency and degree of health care needs among the various middle and secondary school populations.

(5) Establish criteria to be considered in selection of locations or placement of health centers in schools.

C. Health centers in schools are prohibited from:

(1) Counseling or advocating abortion in any way or referring any student to any organization for counseling or advocating abortion.

(2) Distributing at any public school any contraceptive or abortifacient drug, device, or other similar product.

D. The provisions of this Section shall be applicable only to the extent that funds are made available for this purpose from public or private sources.

Section 2. This Act shall become effective upon signature by the governor or, if not signed by the governor, upon expiration of the time for bills to become law without signature by the governor, as provided in Article III, Section 18 of the Constitution of Louisiana.

Signed by Governor Buddy Roemer

July 29, 1991.
